

Breezeline Delivers Faster Connectivity via Direct Onramps to Major Content Providers

The U.S. internet provider deploys advanced network technology to provide powerful connected experiences

QUINCY, Mass. – August 29, 2023 – [Breezeline](#), the eighth-largest cable provider in the U.S., has deployed advanced technology within its fiber-broadband infrastructure to boost performance and to enhance customers' online experience.

Working with [CoreSite](#), a leading hybrid IT solutions provider, Breezeline recently deployed in the data center company's Chicago campus. Breezeline has existing deployments in CoreSite's Miami, Atlanta, and Washington, D.C. data center campuses. The CoreSite colocation services offer a high-performance environment for Breezeline's IT infrastructure and provide customers with the best possible online experience.

"Breezeline is committed to providing customers with a secure, reliable and superfast online experience," **said Aaron Brace, vice president of engineering for Breezeline.** "Our partnership with CoreSite provides us with the interconnectivity and IT infrastructure that enhances connectivity for our residential and business customers across our entire footprint."

Breezeline leverages CoreSite's peering services to directly interconnect with networks and to exchange IP traffic. Breezeline also uses cloud and content onramps at CoreSite's facility for direct connectivity to major cloud and content providers including Amazon, Fastly, Microsoft and Google, vastly streamlining data pathways and providing faster connectivity to content on popular sites like YouTube.
